

**Did you select Rock Our World on your enrichment form?**

**WHY NOT? Don't miss out on an amazing opportunity!**

This spring Glenfir will be representing Canada in the eighth round of Rock Our World! Glenfir is very lucky to have a relationship with ROW that enables us to have one of the 16 coveted spots in the project. Our students at Glenfir are the only students in Canada who have this opportunity

**What is Rock Our World aka ROW?**

Rock Our World brings 16 classrooms around the world together to learn and play together.

We use video cameras, iBooks, Smartboards, webcams, and a lot of cool software!

Each round there is a different focus. This round, we'll be learning about the sun and eclipses! NASA is one of the sponsors of ROW, and will be supplying students in ROW with all sorts of learning opportunities and resources.

**In ROW:**

- ❖ you will make movies
- ❖ you will make music
- ❖ you will video conference with students around the world
- ❖ you will learn to use the Internet for collaboration
- ❖ you will take part in weekly explorations sponsored by groups like Apple, NASA, and the City of Anaheim
- ❖ you will join the Glenfir team that is already famous for their work in past rounds (over 350 schools tuned in to our projects last round!)

**What Mr. Johnson is looking for:**

- ❖ approximately 10 students in grades 4-7 who are interested in film or science or computers (or all three!)
- ❖ students who can attend the world video conference on Saturday, June 7
- ❖ students who want to have a great time on Fridays during enrichment time

Because of the new enrichment schedule for term three at Glenfir this will be the first time ever that we'll be free to work on ROW without the time restrictions of short classes! This will be the best round yet!

**Interested?**

Let your teacher know you want to apply to be a member of ROW or contact Mr. Johnson ASAP!
